

Electronic Trading Accelerators

A Next-Generation Foreign Exchange & Money Market Deal Capture System for Small Business Banking Customers

Currency is one of the most fascinating and dynamic instruments influencing the global economy today. Institutions of all sizes are eager to expand their portfolios, cash management capabilities, and reduce risk through exposure to the global FX markets. This demand is creating enormous opportunities for banks and financial institutions to extend these products and services to new customers, including Small and Medium Businesses (SMBs) who make up one of the fastest growing segments in Treasury Services.

Nexaweb's Electronic Trading Accelerators are customizable Foreign Exchange (FX) and Money Market (MM) components, and the only supported deal capture platform specifically designed to extend existing FX/MM systems to both external

customers and non-trading internal personnel through the Web. Nexaweb's unique "hybrid" approach of pre-built components and advanced customization tools, delivers a tailored deal capture system, with all the benefits of a custom built solution, but at the price-point, support, and time to market advantages of a packaged product.

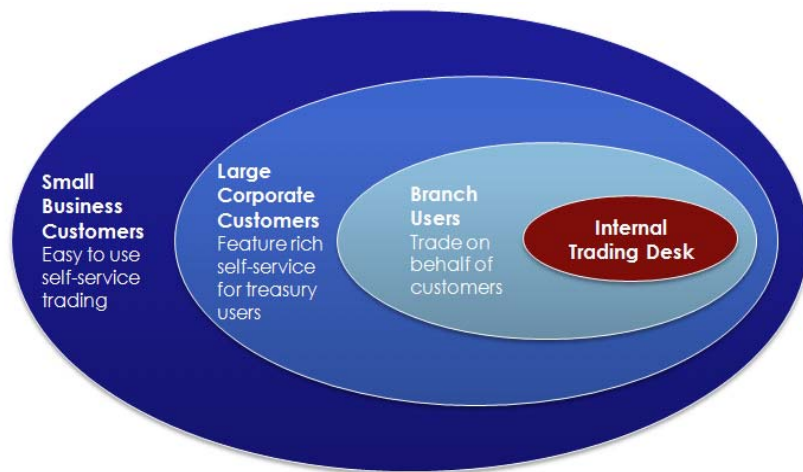

Figure 1: Nexaweb Trading Accelerators extend your Internal Trading Desk out to your customers and non-trading internal users via the web.

With Nexaweb's Electronic Trading Accelerators, your organization can increase market share, create new revenue channels, and improve customer service, by:

- *Removing barriers that prevent adoption by SMB customers and/or Large Corporate clients*
- *Improving Time-to-Market for custom-fit products and services that match your desired client interaction model*
- *Eliminating geographic boundaries to products distribution*

The Electronic Trading Accelerators integrate with existing back-office FX, swift and money transfer, brokerage, DDA, and G/L systems as well as third-party data providers such as Reuters, Bloomberg and SunGard to exceed the rigorous demands of a first-class, global exchange network.

Trading and dealer features and functions include:

- *Comprehensive, multi-currency treasury products*
- *A customizable 'trading blotter' UI complete with real-time quotes and charting*
- *Multiple trading options including FX Spot/Forward, Swap, Limit Order, MM Loans and Deposits, etc.*
- *Flexible customer, product, and service group administrative functionality*
- *Dealer intervention, Customer Self-Service, and Branch UIs*
- *Rules-based trade routing*
- *Automated settlement and fulfillment notifications*
- *Suite of customization tools to create the exact fit for your business.*
