

The Nexaweb Proof of Concept Workshop: Experience Enterprise Web 2.0

See first hand how Nexaweb technology can help your enterprise reduce costs, increase business agility and improve service to customers, partners and employees by leveraging the cost efficiency, flexibility and global reach of the Internet for business-critical applications.

- **A New Web.** The Nexaweb Proof of Concept (POC) Workshop will demonstrate how you can build high performance, rich internet applications quickly and easily with Nexaweb technology – and realize the benefits of Enterprise Web 2.0.
- **Partnership for Success.** The Nexaweb POC Workshop teams your business and IT stakeholders with Nexaweb experts. We will help you define your Internet-based solution, demonstrate proof points and create a roadmap to achieve your business objectives.
- **Zero Risk.** This is the ideal engagement for organizations that are ready to leverage the Internet as an operating platform - and want to see exactly how productively and cost-effectively Nexaweb technology can take you there.

Whether you are creating new applications or re-using existing assets through modernization of your current legacy client/server or Web 1.0 applications, the Nexaweb POC Workshop will demonstrate how you can achieve your goals.

The Nexaweb POC Workshop's proven approach combines software development best practices with a rapid application development (RAD) methodology. Our three-phased approach ensures that project outcomes remain aligned with business goals.
